Donger QD59N hermetic compressor, 1/6 HP (R600a)

`Model: QD59N`

Brand: Donger

Category: Compressors

1/6 HP Donger QD59N hermetic compressor for R600a refrigeration systems, 220V/50Hz LBP, thermally protected.

DESCRIPTION

The Donger QD59N is a 1/6 HP hermetic reciprocating compressor built for low back pressure (LBP) refrigeration duty and charged for R600a refrigerant, as printed on its own green identification label. It is rated for 220V/50Hz single-phase supply and includes built-in thermal overload protection. The retail box, printed specifically for this model and imported especially for Al-Nuboogh Co., also pictures a companion accessory kit (start relay, overload protector, run capacitor, mounting grommets, and connecting leads).
