Manual tube expander (stepped, 1/4"–3/4"), model WK-96

`Model: WK-96`

Brand: DSZH

Category: Spare Parts

A stainless stepped tube expander (model WK-96, 1/4"-3/4") with five graduated expansion diameters marked on the head.

DESCRIPTION

The DSZH WK-96 is a manual stepped tube expander with a stainless-steel head engraved with its model number and a rated capacity of 1/4" to 3/4". The head has five graduated expansion steps, marked from about 6mm up to 16mm in diameter, each with its own insertion depth printed on the tool, letting one head expand several tube sizes. A knurled grip section allows the head to be turned by hand once seated with a separate expander lever.
