Mini tube cutter, model WK-128

`Model: WK-128`

Brand: DSZH

Category: Spare Parts

A compact blue mini tube cutter (model WK-128, 1/8"-7/8" O.D) for copper tubing.

DESCRIPTION

The DSZH WK-128 is a mini tube cutter with a blue cast-metal body engraved with its model number and a rated cutting capacity of 1/8" to 7/8" O.D. It uses a rotating cutting wheel with a pair of roller guides and a knurled black feed knob to control the depth of cut as the tool is turned around the tube. Its compact size suits it to cutting copper tubing in tight spaces on refrigeration and A/C lines.
