Motorcycle Brake/Clutch Lever Assembly

Category: Motorcycle

Black bar-clamp lever assembly with an adjustable lever, brake-light switch connector, and fluid sight window.

DESCRIPTION

This motorcycle lever assembly is a black bar-mounted perch with an adjustable lever, secured to the handlebar with a two-bolt clamp. It includes a two-pin electrical connector for a brake-light switch and a small circular fluid sight window on the perch body, consistent with a hydraulic brake or clutch master-cylinder assembly.
