Ariston ARI STAB electric storage water heater with dispensing tap

`Model: ARI STAB`

Brand: Ariston

Category: Water Heaters

Electric storage water heater from Ariston with a built-in front dispensing tap.

DESCRIPTION

The Ariston ARI STAB is an electric storage water heater fitted with a built-in dispensing tap on the front of the white cylindrical tank, allowing hot water to be drawn directly from the unit. A small circular service port sits alongside the tap, and the tank carries the Ariston logo on its body. It is designed for direct point-of-use hot water dispensing rather than only feeding a separate outlet.
