# Washing Machine Water Level Pressure Switch

**Category:** Washing Machines

**Washing machine water level pressure switch with white plastic housing, metal collar, 3-pin terminal block, and air-pressure nipple.**

### DESCRIPTION

This washing machine water level pressure switch has a white plastic barrel housing with an internal blue 3-pin terminal block visible through the open casing, a metal collar ring seated at its base, and a plastic air-pressure nipple protruding underneath for connection to the tub's pressure hose. It mounts through a panel opening and switches contacts as tub water level changes the air pressure at the nipple.
